Work Experience

Razorpay

Bangalore, India

Senior Software Development Engineer

March 2026 - Present

- **Architected an AI orchestration framework** enabling engineers to invoke reusable **skills** and **plugins** directly from **Slack**, using **Python** and **AWS SQS** to automate workflows including test generation, PR reviews, and engineering operations.
- **Built an end-to-end testing harness** covering the full validation lifecycle including **test generation, execution orchestration, utility abstraction, and live reporting**, reducing manual effort and improving release confidence across engineering teams.
- Owned **observability and operational excellence** through **Prometheus, Grafana**, and proactive alerting, enabling faster detection and mitigation of regional and localization issues.

Software Development Engineer

September 2024 - March 2026

- Worked within the **Internationalization (i18n)** team to build and scale **region-agnostic payment infrastructure** using **Golang, PostgreSQL**, and **AWS**, supporting global payment workflows across multiple geographies.
- Contributed to core payment products including **Payment Links** and **Subscriptions**, enabling reliable multi-region support across currencies, time zones, and localization requirements.
- **Designed and launched** a centralized **test orchestration platform** with a live reporting portal spanning **7+ microservices**, accelerating debugging and improving confidence in critical i18n releases.
- **Led development** of region-aware utilities for zip codes, date/time, and currency handling through the **i18nify** module, eliminating **90 %** of hardcoded localization logic across **9+ services**.

Bajaj Finserv Health Limited

Pune, India

Software Development Engineer

July 2023 - September 2024

- Empowered **seamless issuance journeys** with-in **7 sec** time frame for over **12+ clients** for Health-Tech products in the **Integration Layer** module, an **event-driven orchestration layer** crafted in **Java** and **Spring Boot**
- **Led** the development of a single sign-on microservice leveraging **NestJS, TypeScript, MongoDB, and Redis**, achieving **99.99%** API success rate and system up time, streamlining authentication, and enhancing security and user experience
- Streamlined claim detail exchange between partners with event-driven architecture using **Kafka**; bolstered system resiliency via **DLQ with MongoDB, Azure Service Bus**, slashing database queries by 95% and cutting cost by 40%
- Led the enhancement of backend processes for policy issuance, ensuring 99%+ uptime and escalating issuance rates from **1,200** to over **5,000** policies per hour, drastically enhancing productivity
- **Designed and developed** a highly efficient microservice using **pub-sub principles and GRPC** for processing Salesforce platform events. A **scalable solution** that increased event processing speed by **60%** and reduced downtime by nearly **90%**

Projects

The Chess Website: A Ready to use chess platform for players of all skill set

[Source Code](#)

- Fully **interactive & 100% responsive** chess website using **ReactJS** and **styled-components** for the frontend
- Engineered the backend with **NestJS** and integrated **MongoDB** for efficient data storage and retrieval, optimizing the system for user data handling. Established secure user **authentication** and **session management** with **JWT**

CyberCrypto: A crypto information exchange platform

[Source Code](#)

- A real-time crypto service providing comprehensive details for all major queries of crypto traders, with **99.9%** accuracy, using **ReactJs, bootstrap**, Used **Redux Toolkit** for optimizing **API** calls, Deployed on Netlify

NoteSync: A note synchronization extension

[Source Code](#)

- Browser extension using **ViteJS** to create a note-taking tool that stores user notes for individual web pages. Leveraged **browser storage** capabilities for efficient data management

Technical Skills

Languages: Golang, Java, C++, JavaScript

Backend & Distributed Systems: Golang, Spring Boot, Node.js, NestJS

Datastores: PostgreSQL, MongoDB, Firebase

Cloud & Infrastructure: AWS, Azure, Docker, Kubernetes, KEDA

Version Control & Tooling: Git, Github Actions, Argo workflows

Education

University Institute Of Technology, RGPV, Bhopal

July 2019 - June 2023

B.Tech in Electronics & Communications Engineering

8.4/10 CGPA
